Sept 2021- Nov 2022

Teaching university students the basics of JavaScript

Math Tutor

Sep 2020-Jul 2022

Taught students from grade 9 to grade 12(GS students)

PROJECTS

Airline Reservation System

- Created an ARS using java and SQL for adding and logging in customers, and canceling, booking or paying for flights.

Location Search Engine

- Created a simulation of a GPS where users can search for nearby places like tourist places, restaurants, theaters, Bank ATMs or markets, etc. the addresses were inserted manually using DynamoDB and fetched in JSON format using postman

Twitter Data Pipeline

- Extracted data from the Twitter API using the tweepy library in python and stored it into a CSV file in an AWS S3 bucket using an ETL pipeline made with airflow .

Airbnb Beirut Apartment Web Scraper

- extracted the title, number of beds, price per night and ratings of apartments in Beirut listed on Airbnb using BeautifulSoup and requests and uploaded the data to a CSV file using the writer library

TECHNICAL SKILLS

Programming Languages:

Excellent HTML, C, Java.

Intermediate Python, MySQL, PostgreSQL, JavaScript

Beginner AWS (EC2, S3, DynamoDB), C#, R, PHP, PL/SQL

Social Skills:

Time Management, Problem Solving, Communication, Adaptability.

CERTIFICATES

SQL Intermediate, HackerRank

May 2023

Advanced Relational Database and SQL, Coursera

April 2023

ETL and Data Pipelines with Shell, Airflow and Kafka, Coursera

March 2023

COURSEWORK

Web Development, Database (SQL), Algorithms and Data Structures, Software Engineering, Object Oriented Programming, Image Processing, Probability and Statistics, Project Management

LANGUAGES

Arabic (Native), French(Fluent), English(Fluent), Italian(Beginner).
